Emergency.

Climate crisis.

Fact not fiction.

People need the truth.

National Briefings must be televised.

In person by the Prime Minister.

Government's first duty is to protect citizens.

So show the evidence and explain the predictions.

It's not all doom because there are solutions available.

But to make them work requires a whole-society approach!

(Thousands of screenings of the National Emergency Briefing have already taken place throughout the country. Upcoming ones in our area are on October 10th at Gretton and October 21st in Desborough. One is also scheduled in Oakley Vale with date yet to be announced. Check nebriefing.org for details.)
